All in One Antimicrobial Interior Protection

Frequently Asked Questions

Where Xzilon Technology come from?

Xzilon interior protection comes from a Dow Corning Technology used and developed for the aerospace industry. It is essentially a modified sand molecule with a silane bonding agent, which is as harmless to the environment as sand. It can be compared to the likeness of super glue, with a covalent bond. The fact is, it is a distant cousin of super glue. Xzilon's interior protection is a hyper-green solution that covalently

Is Xzilon safe?

In use Xzilon Interior Protection is Safe for adults children and pets.

It does not wear off the surface and is made with Hyper-green technology. Xzilon Interior protection is accepted, registered, and used worldwide. Our Environmentally friendly nano-technology system is both a disinfectant treatment coupled with a semi-permeable layer of protection on treated surfaces. Our revolutionary system is designed and formulated to kill and protect along with providing stain protection and odor resistance. It will not rub off onto the skin or into the environment. It does not setup an environment that encourage the development of resistive organisms (super-bugs). Our technology is a safe, proven technology with a thirty-year history.

Why should I use Xzilon Protection?

Because you care about protecting yourself and those you love from harmful bacteria. Xzilon's interior protection technology provides your family, your employees, and your customers with the highest level of environmentally friendly disinfectant protection available, giving you greater peace of mind. Xzilon is 99.99% effective against a broad spectrum of microorganisms. It virtually bonds to all materials and surfaces both painted and unpainted.

Provides unsurpassed protection with unsurpassed durability

Our technology provides long-term protection on treated surfaces with a product that will not degrade vehicle interiors. Feel confident with a product that will leave a biostatic finish that kills both germs and odor-causing microbes. Experience a higher resale value - 15% to 20% higher price when re-selling a treated vehicle. Based on a \$60,000 price, that could mean a gain of \$12,000. Xzilon's technology significantly reduces cleaning costs, eliminating the need to purchase expensive sanitizing products for daily use. Cleaning time is greatly reduced in areas treated with our product, allowing for more efficiency and effectiveness, and maintains a refreshing smell.
