

Fabric & Carpet Stain Protection

Fabric and Carpet Stain Protection

Your vehicle's interior fabric and carpet is often easy to stain, susceptible to blue dye transfer and a hot bed for germs and other harmful microbes.

- **Easy to Apply & Clean**
- **Continuous Stain and Odor Barrier**
- **Works on All Soft Interior Surfaces**
- **Active on Treated Surfaces 24/7**
- **Completely Safe and Non-Flammable**
- **Environmentally Friendly & Hypergreen**
- **VOC and Fluorocarbon Free**
- **Antimicrobial Protection for Odor Causing Germs**

The New Standard for Eco Friendly Fabric and Carpet Protection Upgrade to the "New Standard" in Interior protection with our Fabric and Carpet Protection for your vehicle's interior cabin and trunk. Won't change the look or feel of surfaces!

Why It's Important The car is consistently dirtier than the home, having 17,000 times more bacteria, according to a study done by GAP EnviroMicrobial Services. The cup holder in a car has 228% more bacteria than the average toilet seat.

We've Got You Covered with continuous resistance from stains, blue dye transfer, odors and microbes. Non-flammable, VOC and fluorocarbon free, non-C-8 based fluoroalkyl compound and is considered to be Non-PFOA contributing.

How It Works: It produces a durable finish that helps all types of fabric retain their fresh new look longer. Can be used on all types of upholstery fabric and carpet including synthetics, natural fibers and their blends.

How It's Different: Our Fabric and Carpet Protection is effective on all types of fabric and carpet substrates. It is a fluorochemical finishing agent that provides excellent water and oil repellency as well as soil resistance.

Features and Benefits:

- Accepted, registered and used worldwide.
- Environmentally safe and hypergreen formula that does not contain or release harmful chemicals.
- Does not rub-off or migrate onto the skin or into the environment.
- Protective layer makes surfaces easy to clean including food, grime, mold, dirt.
