

Leather & Vinyl Protectant

Leather and Vinyl Protectant

Proven to be effective at reducing the effects of wear and stains on leather and vinyl.

- **Enhances Feel and Suppleness**
- **Long Lasting without repeated applications**
- **Provides Unsurpassed Durability**
- **In use, safe for adults, children and pets**
- **Non-flammable and Non-hazardous**
- **Protects against Dye Transfer**
- **Improves Cleanability**
- **Antimicrobial Protection for odor causing germs**

Leather and Vinyl Protectant has an antimicrobial additive that helps keep leather looking better longer. Watery and oily spills bead up on the surface and can be easily blotted away. Leather and vinyl treated with Xzilon Leather & Vinyl Protectant provides long lasting protection against stains, blue dye transfer and is resistant to wear.

Holds up to repeated spot cleaning. It produces a durable finish that helps all types of leather and vinyl retain their fresh new look longer. Leather and Vinyl Protectant can be used on all types of leather and vinyl including synthetics, natural fibers and their blends. Helps reduce cracking and fading caused by the environment.

Environmentally Safe and Hypergreen. It is a non-C-8 based fluoroalkyl compound and, as such, is considered to be non-PFOA contributing. Is versatile and effective on all types of leather and vinyl. Is a water-based fluorochemical finishing agent that provides excellent water and oil repellency, and soil resistance on all types of leather and vinyl.

Leather & Vinyl Protectant

Frequently Asked Questions

Where does Leather & Vinyl Protectant come from?

It is a non-C-8 based fluoroalkyl compound and, as such, is considered to be non-PFOA contributing. Leather & Vinyl Protectant is a Hyper-green solution that covalently bonds to the surface and does not end up flushed into the environment. It physically bonds to the surface and creates a durable anti-microbial barrier to give long term protection. It is highly durable and long lasting.

Is Leather & Vinyl Protectant Safe?

In use, it is completely safe for adults, children and pets. It does not wear off the surface and is made with Hypergreen technology. Leather & Vinyl Protectant does not rub off onto the skin or into the environment. It is Non-flammable and Non-hazardous.

Why should I use Leather & Vinyl Protectant?

To protect your leather and vinyl and keep the suppleness. It also improves cleanability and protects against Blue dye transfer. Offers long term protection on treated surfaces with a product that won't degrade vehicle interiors.

Provides unsurpassed protection with unsurpassed durability.

Holds up to repeated spot cleaning and helps all types of leather & vinyl retain their fresh new look longer.

Significantly reduces cleaning costs, eliminating the need to purchase expensive sanitizing & conditioning products for daily use. Cleaning time is greatly reduced in areas treated with Leather & Vinyl Protectant allowing for more efficiency and effectiveness.
